- iii. Open the installer and follow the instructions.

Steps to Create a GitHub Account

- 1) Go to the GitHub sign-up page (<https://github.com>).
- 2) Fill in the details to create a new account.

Steps to Start a Git Repository and Make Your First Commit

- i. Open Git Bash on your computer.
- ii. Go to your project folder using the `cd` command.
- iii. Start a new Git repository:

```
git init
```

- iv. Add your project files to the repository:

```
git add .
```

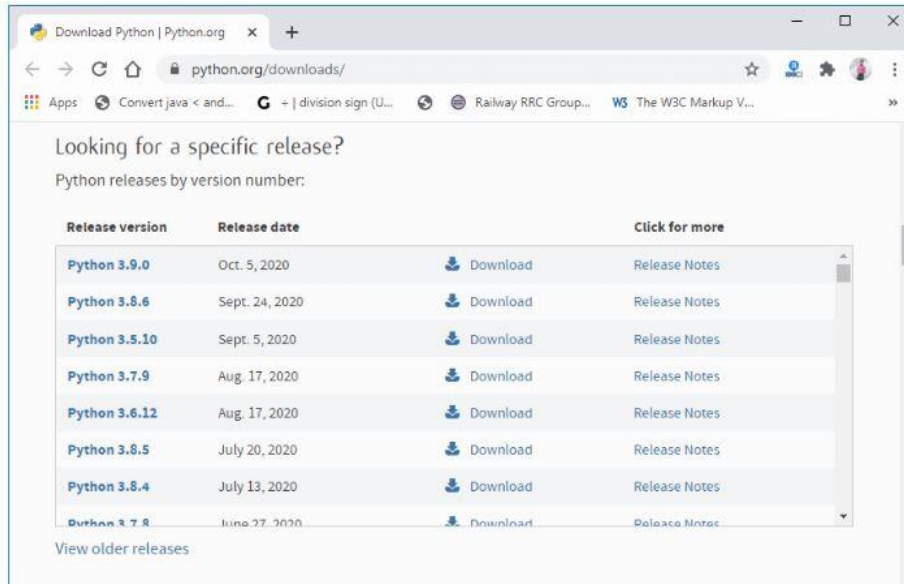

- v. Save the changes:

```
git commit -m "Initial commit"
```

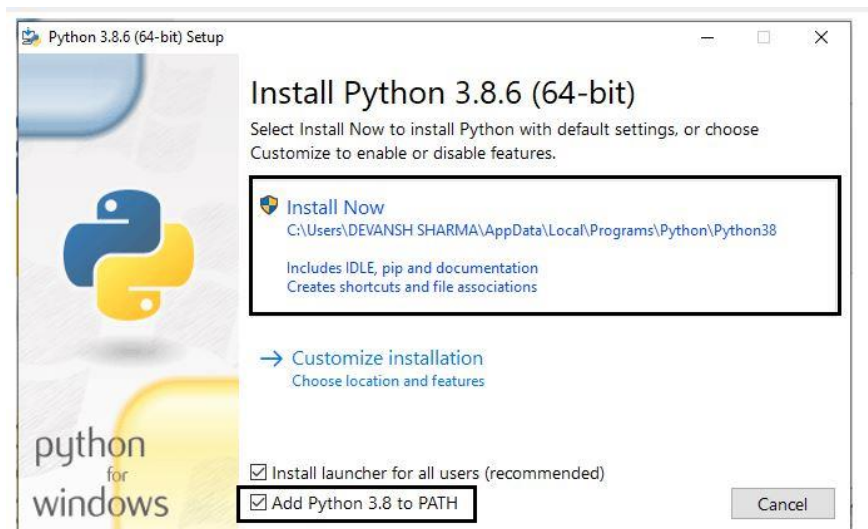

4. Install Necessary Programming Languages and Runtimes

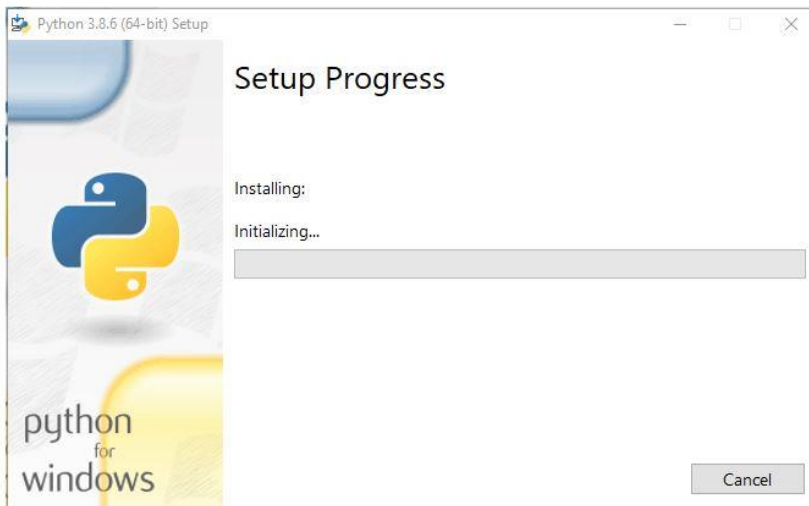

Steps to Download and Install Python:

- i. Go to the Python download page(<https://www.python.org/downloads/>).

- ii. Download the latest version of Python for Windows (my OS)
- iii. Open the installer and make sure to check "Add Python to PATH" before installing.

- iv. Verify the installation by opening Command Prompt and typing:

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.19045.4529]
(c) Microsoft Corporation. All rights reserved.

C:\WINDOWS\system32>python --version
Python 3.12.4

C:\WINDOWS\system32>
```

5. Install Package Managers

Package Manager: pip (comes with Python)-pip is installed with Python.

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.19045.4529]
(c) Microsoft Corporation. All rights reserved.

C:\WINDOWS\system32>python --version
Python 3.12.4

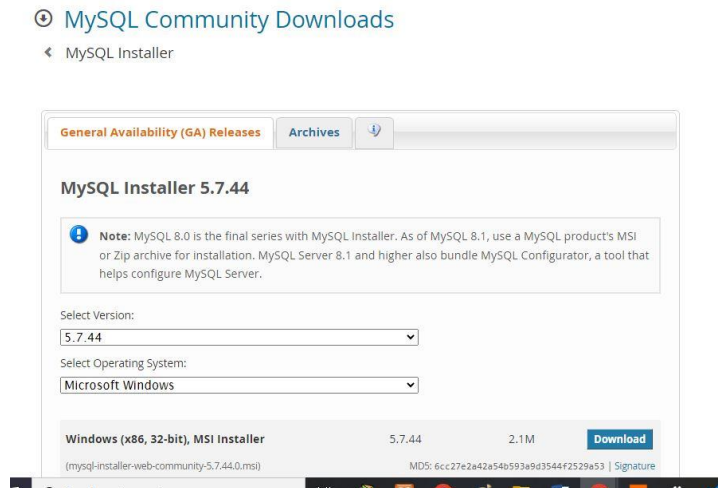

C:\WINDOWS\system32>pip --version
pip 24.0 from C:\Users\OWNER\AppData\Local\Programs\Python\Python312\Lib\site-packages\pip (python 3.12)

C:\WINDOWS\system32>
```

6. Configure a Database (MySQL)

Steps to Download and Install MySQL:

- i. Go to the MySQL Installer page :
<https://dev.mysql.com/downloads/windows/installer/5.7.html>
- ii. Download the MySQL Installer for Windows (my OS)

- iii. Open the installer and follow the instructions to install MySQL Server.
- iv. Set up MySQL Server as needed during the installation.

7. Explore Extensions and Plugins

Steps to Add Extensions to Visual Studio Code:

1. Open Visual Studio Code.
2. Click the Extensions icon in the sidebar.
3. Search for and install recommended extensions:
 - GitLens: For Git support.
 - Prettier: For code formatting.
 - Docker: For Docker support.
